## Locator Overdenture Attachment Introduction

For years, I have been looking for an Overdenture attachment that was both effective and easy for the patient to manipulate. I have been a long time user of the ZAAG attachment and through my conversations with the people at Zest anchors, they were able to come up with this new design which meets all of my requirements for an ideal Overdenture attachment. I have put this module together to show you how the attachment works and to describe the benefits for you and for your patients when using this Overdenture attachment. SRD

Disclaimer: While I enjoy very much working with the Zest Anchor Company, I am not employed by them and I do not receive any money from them. I have published several articles about their attachments in the past and I will continue to do so in the future when I find products that are worthwhile in my endeavors. I have included a link to their web site here as a convenience to my readers... SRD
