

## Hybrid/Bar Overdenture

Last Updated Tuesday, 22 August 2006

### Mandibular Hybrid Overdenture and Maxillary Bar Overdenture

This patient was also facing the loss of all of her teeth. The photos represent the finished dental work which was placed about one year after the initial visit. The upper arch is an implant retained and supported overdenture on four implants and a bar. The lower restoration is a fixed/detachable restoration on six implants.
