

# Visual Explanation of Dental Implants

Last Updated Tuesday, 07 November 2006

## A Visual Explanation of How Dental Implants Work

Using the 'Visual Explanation Menu' on the upper left side of this page, we are going to take a little tour here using dental x-rays to show the real differences between natural teeth and dental implant supported restorations. I think it will give those of you who are not familiar with the way that dental implants work a better understanding of the goals of placing dental implants.

To see actual techniques and various clinical situations, use the 'Patient Treatment Menu'. Use the links in the 'Visual Explanation Menu' on the left for navigation in this module. Enjoy, and if you get a chance, let me know what you think of this section.

If you have a specific question about dental implants. . .{mosloadposition contact}
