MORE INFORMATION

There is still much more information about dental implants that we have to look at. This section trys to fill in the blank areas and expand on some of the information that has already been provided. There are sections here on dental implant technique, Cosmetic Dentistry, Bone Grafting and other areas of dental reconstruction. The visual Explanation of dental implants is a pretty good place to start. I have also included some reading recomendations and links to other dental recources. Enjoy...SRD
