

Fee Schedule

Last Updated Wednesday, 04 March 2009

Effective February 10, 2009

Base Implant Fee: \$0.00/implant

IMPLANTS: (additional fees)

Posterior Mandible:
\$750.00

(When implants are placed in the back part of the lower jaw, there may be an additional charge of \$750.00 for the surgical procedure. This is because there is greater difficulty in this area due to the major nerve bundle that is present)

Bone Regeneration:
\$750.00 (Minimum - \$550.00)

(When there is insufficient bone in an area requiring an implant, there will be an additional charge for bone regeneration techniques)

Sinus Elevation:
\$2450.00

(When the size of the sinus prevents an implant procedure, it must be filled with bone. When I do the procedure, commonly known as a sinus lift, the fee is \$2450.00 per sinus.)

Osteotome Elevation:
\$950.00+

(Sometimes, when the sinus is large but there is some bone for implant placement, the floor of the sinus can be pushed up with this technique allowing for proper implant placement)

Wide Diameter Implant:
\$250.00

(Wide diameter implants are useful in areas where there is not a lot of bone height or in supporting larger molar teeth)

Narrow Diameter Implant:
\$250.00

(When there is not enough room for a regular diameter implant, a narrow diameter implant is used. Even though this is actually a smaller piece, it is more expensive)

Coated Implant: \$250.00

(Coated implants are occasionally used in soft bone to promote closer bone adaptation. These implants are more costly)

Special Surface Implant:
\$250.00

(Like coated implants, these implants are used to promote close bone adaptation in areas where the bone is soft or weak)

RESTORATIONS:

Crowns: \$1850.00

(The restoration or "Cap" used to replace a missing tooth or a series of missing teeth)

Abutments: \$750.00
+

(The part that
connects the implant and the restoration)

Overdentures: \$7550.00+
(Complete Denture \$3500.00)

(A removable
restoration that attaches to implants. It is made of acrylic resin.
These restorations vary considerably in expense)

Overdenture/metal 9500.00 +

(Part of the
acrylic resin is replaced by metal for greater strength and a thinner
restoration)

Hybrid: \$18,500.00
+

(This restoration
is a permanent restoration. It can be removed by me, but otherwise,
it stays in your mouth all the time)

Slant-Lock \$18500.00
+

(This is a
special type of Overdenture with a locking bar. When the lock is closed,
it works like a permanent restoration. You can open the lock and remove
it for cleaning)

Attachments: \$750.00
+

(Various attachments
may be used to anchor overdentures)

Bar \$7500.00 +

(A bar might
be added to a removable restoration for greater stabilization)

These fees are subject to change without notice.
